Manufacturer Acronis
Manufacturer# EZSXP5ENS21

Description

When Mac users try to access Windows file servers and NAS devices, they typically suffer from poor performance, data integrity issues, slow searches, and many other disruptive problems. Acronis Files Connect solves these problems. At its core, Acronis Files Connect is an AFP server that runs on your Windows server and enables Macs to connect to file shares and NAS via Apple Filing Protocol (AFP) instead of the Server Message Block (SMB) protocol.
