TML - Worry-Free Services 5 - Extension - 11-25 User - 12 Months

Manufacturer Trend Micro
Manufacturer# WF00219023

Description

Worry-Free Business Security is safer because it stops viruses, spyware, spam, and other email, file and web threats before they reach your business. It's smarter because it detects threats faster and constantly updates your protection without slowing PC performance. And it's simpler because it is easy to install and maintain - you have zero administration. Trend Micro Worry-Free Business Security solutions provide a safer, smarter, and simpler way to protect your business assets. Unlike other antivirus and antispam solutions, Worry-Free Business Security solutions are powered by the Trend Micro smart protection network. This next-generation security infrastructure provides a unique approach to blocking viruses, spyware, spam, and web threats before they reach your business - it's like having a global neighborhood watch. Worry-Free Business Security continuously updates protection, with at least 80 percent of updates residing on the local security server - not on users' PCs. This enables fast scanning to stop the latest threats without significantly impacting performance over time. And it's easy - users stay protected with zero administration.
