Description

The GP-101ST Gigabit PoE (Power over Ethernet) splitter delivers both data and electrical power to non-PoE Fast Ethernet or Gigabit Ethernet enabled products, such as network cameras and wireless access points, using an Ethernet cable and without deploying power outlets and electrical cabling. Ideal for remote locations, the GP-101ST allows data transfer between the PSE (power source equipment) and GP-101ST up to Gigabit speeds and delivers power output voltages simultaneously. The GP-101ST is easy to install and requires no tools or software, while offering the benefits of cost savings as well as flexible network planning and high reliability.
