### Description

6.5" ceiling speaker with corrosion free grille is suitable for the installation in suspended ceilings of any material. It is equipped with a full-range driver. Quick snap-in mounting due to round ceiling cut-out through which the speaker with transformer and mounting ring can be installed. A push-terminal block allows a quick and easy connection to the 100-V-network including the eventually necessary level adjustment. A quick-mounting bayonet connection provides an easy installation of the grille.

### Specification

|                     |                                             |
